On rainy and muddy days the High Sheriff might have an officer stationed at each street intersection in the business district to prevent the hackmen and all drivers of vehicles from driving over crossings faster than a walk. Mainland cities are provided in this manner, and woe betide the driver who attempts to dash by an officer of the law on a rainy day.

POSTAL STRIKE  
NOW IS SETTLEDNew Men Fill the Places of  
Old Employees Who Can  
Not Return.

The "strike" at the postoffice has been settled so far as the officials of that department are concerned. New men have taken the place of the five striking members of the mail division and are being instructed in their duties. The present lull in the mail receipts from the Coast has been ample to give the new men time to get acquainted with the ins and outs of the office, and it is believed they will be able to handle the big mail expected on the 8th instant without much difficulty.

None of the strikers have been taken back, and their places have been filled by W. F. Hill, at the general delivery window, and Mr. Davis at the ladies' window. Mr. Bartel is coming from Hilo to take the place of dispatch clerk made vacant by Norman Orme. Two other men, Henderson and Hodson, have also been added to the force. It is proposed in the future to shift the men about the office at intervals so that each may become accustomed to the working of every department. Heretofore the men were specialists in their own departments.

A meeting of the Murphy pledge-signers was held last evening at the Young Men's Christian Association Hall, and the charter, which had been drafted by the committee appointed for that purpose, was read and adopted section by section. ## THE ANGLE LAMP

THE LIGHT  
THAT NEVER  
FAILS.

It seems almost incredible that any lamp could be good enough to take the place of electricity on even terms, yet such is the case with the ANGLE LAMP. All over the island people are throwing away their old lamps and replacing them with this lamp, not merely because it costs about one-tenth as much to maintain (cost is no object to some people), but, besides being infinitely cheaper, it is more brilliant and more reliable in the bargain. It is a revelation.
